Emilio Ciappi

CCNA | eJPT | AZ-900 | Python

Copenhagen, Capital Region of Denmark, Denmark

Summary

Based in Copenhagen, Denmark | Open to Relocation I am a CCNA and eJPT certified professional launching a career in Network Engineering and IT Support, bringing a security-first mindset to infrastructure management. My technical foundation combines solid networking knowledge with hands-on experience in Python scripting and identifying critical web vulnerabilities. Core Areas of Expertise:- Networking & Support: Hands-on experience in routing, switching, and troubleshooting network environments, fully prepared to add immediate value as a Network Engineer or IT Supporter.- Security & VDPs: Active participant in Bug Bounty and Vulnerability Disclosure Programs (VDPs), where I have successfully identified and reported high-impact vulnerabilities, including IDORs and sensitive data exposure.- Network Automation: I am currently focusing my professional development on mastering Network Automation to help organizations build modern, efficient, and code-driven infrastructures. I am highly adaptable, driven by continuous learning, and actively seeking new opportunities both in Denmark and internationally.

Experience

Netto, Salling Group

Union Representative and Warehouse worker

May 2025 - Present (1 year 3 months)

Copenhagen

Profesional independiente

Python Developer

April 2023 - Present (3 years 4 months)

Achievements:

- I created a program that searches for words in a folder of PDFs and generates a Word file. This file includes the book's name, the page where the word is found, and a 100-word paragraph that provides context to the user.

- I managed to increase accuracy and improve performance by 50% compared to the previous competition.
- I achieved an impressive 80% increase in client workflow efficiency, significantly accelerating the process. I am currently working on adapting the program to other types of needs to further enhance its functionality.

Tools that I used: Python, PyPDF, Docx, Tkinter.

Yunnan Viajes

Spanish Tour Guide in China

October 2023 - November 2024 (1 year 2 months)

China

- Led Spanish-speaking groups on guided tours, providing cultural insights and ensuring a smooth, engaging, and personalized experience.
- Collaborated with small local restaurants, assisting in basic food preparation, plating, and ensuring meals were served efficiently.
- Managed table assignments and took orders, acting as a communication bridge between customers and restaurant staff due to language barriers.
- Helped explain menus, recommended local dishes, and ensured tourists had a seamless dining experience.
- Supported restaurant operations during peak hours, adapting to different tasks as needed in fast-paced environments.
- Developed customer service skills, handling special requests, dietary restrictions, and ensuring client satisfaction.

Kan Di Ge

English Teacher

September 2019 - August 2023 (4 years)

Kunming, Yunnan, China

Achievements:

- I developed and conducted interactive and dynamic English classes for preschool-aged children.
- I adapted my teaching approach to effectively communicate with children, despite the language barrier, as I was prohibited from speaking Chinese with the students.
- I utilized various methodologies, such as body language, the use of real objects (Realia), and visual resources to facilitate understanding and learning.
- I fostered an inclusive and stimulating learning environment that promoted active participation from children and sparked their interest in the English language.

- I regularly assessed the students' progress and provided constructive feedback for their linguistic development.

Freelance

Python and Selenium Developer

March 2023 - April 2023 (2 months)

Achievements:

- I developed a script using Selenium to automate the submission of audio files, simulating the use of the microphone.
- I improved the client's productivity by 20%.
- I established effective communication with the client, which allowed me to identify and successfully resolve the issue presented.

Tools that I used: Selenium, Python, Zoom, Fiverr.

Revistas para móviles

Frontend PWA developer

February 2022 - June 2022 (5 months)

Achievements:

- I managed to find and collaborate with a backend developer for the project, which was a significant milestone considering my initial limited experience in HTML and CSS.
- I learned to use Vue.js by integrating HTML and CSS.
- I implemented the WindiCSS library, resulting in a 30% performance improvement in CSS usage.
- I established effective communication with the client, which enabled me to identify and resolve the presented problem satisfactorily.

Tools that I used: Vue.js, HTML, CSS

Education

Universidad Abierta Interamericana

Bachelor's degree, Law · (March 2006 - December 2013)
